DESCRIPTION

Administrative agencies play a critical role in determining the obligations, entitlements, and quality of life of the American public. This course will introduce students to the constitutional and statutory frameworks that regulate administrative agencies in their exercise of this power. Focusing on the major federal agencies, we will consider the forms of agency action (e.g., noticemaking and adjudication) and the procedures required by the Administrative Procedure Act, the constitutional constraints that limit agency action, and the means used by Congress, the President, and the courts to control and review what agencies do.
